

Kane Russell

Centre Back

Today's match

GOING WELL

- Penalty corner conversion — scored 2 from 4, stepping up in big moments
- Swing defence as centre back — getting into good positions to support defensive structure
- Pushing wing halves up the ground effectively, creating space and support
- Aerial play — strong long and short aerial ball, real variety

NEEDS WORK

- Off-ball defensive influence needs to match your set piece performance — marry the two together
- Ground game balance — push, bar sweep, hit all need to be as sharp as your aerials
- Communication — keep building this, it's a space you can really lean into

NEXT GAME FOCUS

Balance your on-ball game. Your aerial is a weapon — now make sure your ground game is just as strong. When the moment calls for it, back yourself to punch forward with the ball.

OVER TO YOU

Watch your clips back with one question: where could I have used my ground game instead of going aerial? Come back to me with what you find.
